The mission of the Feather River Air Quality Management District is to promote and improve the air quality of Sutter and Yuba counties. This is accomplished through monitoring, evaluation, education, by implementing control measures to reduce emissions from stationary sources, permitting and inspection of pollution sources, enforcement of air quality regulations, and by supporting and implementing measures to reduce emissions from motor vehicles.
The District
The Feather River Air Quality Management District is a bi-county District that was formed in 1991 to administer local, state, and federal air quality management programs for Yuba and Sutter counties. The District is located in Northern California in the Sacramento Valley Air Basin. There are currently nine fulltime employees and one part-time employee.

Population (2010 Census)/ Land Area (square miles): Sutter Co. - 94,737/602.5 ; Yuba Co. - 72,155/630.7

Environmental Justice
The Feather River Air Quality Management District is committed to environmental policymaking, community planning, and regulatory enforcement practices that are fair and equitable to all business owners and residents of Yuba and Sutter counties regardless of age, culture, ethnicity, gender, race, socioeconomic status, or geographic location in order to protect against the health impacts of air pollution.

The Position
The Air Pollution Control Officer serves as Executive Officer to the Feather River Air Quality Management District by managing, coordinating, and supervising the activities of the District under the policy direction of the District Board.

Example of Duties
The following is a partial description and is not restrictive to duties required:
Selects, assigns, supervises and reviews the work of subordinates; serves as administrator and enforcement officer for the District; administers state and federal grant monies and other revenue; administers and implements the District permit system; develops and implements the District rules and regulations; administers and controls agricultural, residential and commercial burning; administers and implements the District's Air Quality Attainment Plans, meets and confers with public officials and representatives of agriculture, business, industry, professional and civic groups on air quality; receives direction from and represents the District Board at hearings and other meetings; prepares and disseminates information to increase the public knowledge and understanding of air pollution and its control; compiles records and prepares reports of progress; administers and controls agricultural, residential and commercial burning; approves and certifies permits and enforcement actions; attends and reports on hearings and other meetings; serves as a member of the District Board.

Minimum Requirements
Knowledge of:
- Principles and practices of air pollution control; local, state and federal laws pertaining to air pollution control; basic factors contributing to air pollution relative to agricultural and forestry practices, industrial facilities, combustion processes and transportation; methods of collecting and identifying pollutants; methods of supervision, training, management, budgeting, program planning and public administration; law enforcement principles, methods and practices.

Ability to:
- Interpret and enforce laws, rules and regulations; prepare clear and concise reports; deal effectively with the general public as well as with governmental and industrial officials to gain compliance with air pollution laws and regulations; supervise the technical staff and direct the technical activities of the air pollution control program.

Minimum Requirements Continued
Education and Experience: Equivalent to graduation from an accredited four-year college or university with a Bachelor’s degree in chemical, environmental, civil or mechanical engineering and (4) four years of professional air quality experience plus (5) five years of management experience. Possession of an advanced degree in a related field is desirable; or an equivalent combination of training and experience.

License: Possession of a valid California Driver's License with an acceptable driving record.
